

- The FCC should not implement any proposal that would lessen Indiana's Telephone Privacy law protections.
- It is so wonderful not to be bothered by tons of calls every single day. My family can now sit down to a peaceful dinner. I'm sick and tired of my privacy being invaded and not having a choice. Our Attorney General has give us our family unit back by stopping the phone calls.
- I used to receive about 20 calls per week, now I only receive maybe one from a newspaper every so often. It has been wonderful.
- Please do not take our wonderful Indiana Law away. Indiana's Telephone Privacy law protections is a wonderful give to a family.

Thanks.
